## CUMBERLAND VALLEY ANALYTICAL SERVICES

Laboratory services for agriculture ... from the field to the feed bunk.

---

To our valued clients:

CVAS as an essential service business will continue to operate as long as we are permitted by governmental authority and in consideration of mitigation of Covid-19 transmission risk to our employees and the local community. We do not expect disruption in providing NIR and other key services. There may be an extension of turnaround with some chemistry analysis due to schedule adjustments reflecting employee availability. We will keep you posted of any changes that materially affect our ability to provide an efficient return of analysis results.

Clients interested in having sampling supplies shipped directly to producers should contact us at [mail@foragelab.com](mailto:mail@foragelab.com) with the request. Please include your name, account number and the producers who should receive sample supplies as well as their address and the number and type of supplies to ship.

As we adapt to these business changes, information concerning the extension of turnaround times will be made available on our website.

Please do not hesitate to call or e-mail if you have questions regarding service need at [mail@foragelab.com](mailto:mail@foragelab.com) or 1-800-CVASLAB.
