# CUMBERLAND VALLEY ANALYTICAL SERVICES

*“ Laboratory services for agriculture ... from the field to the feed bunk ”*

---

**Starting Thursday, June 18<sup>th</sup>, 2020**

## **CVAS California Drop Box Pick Up System**

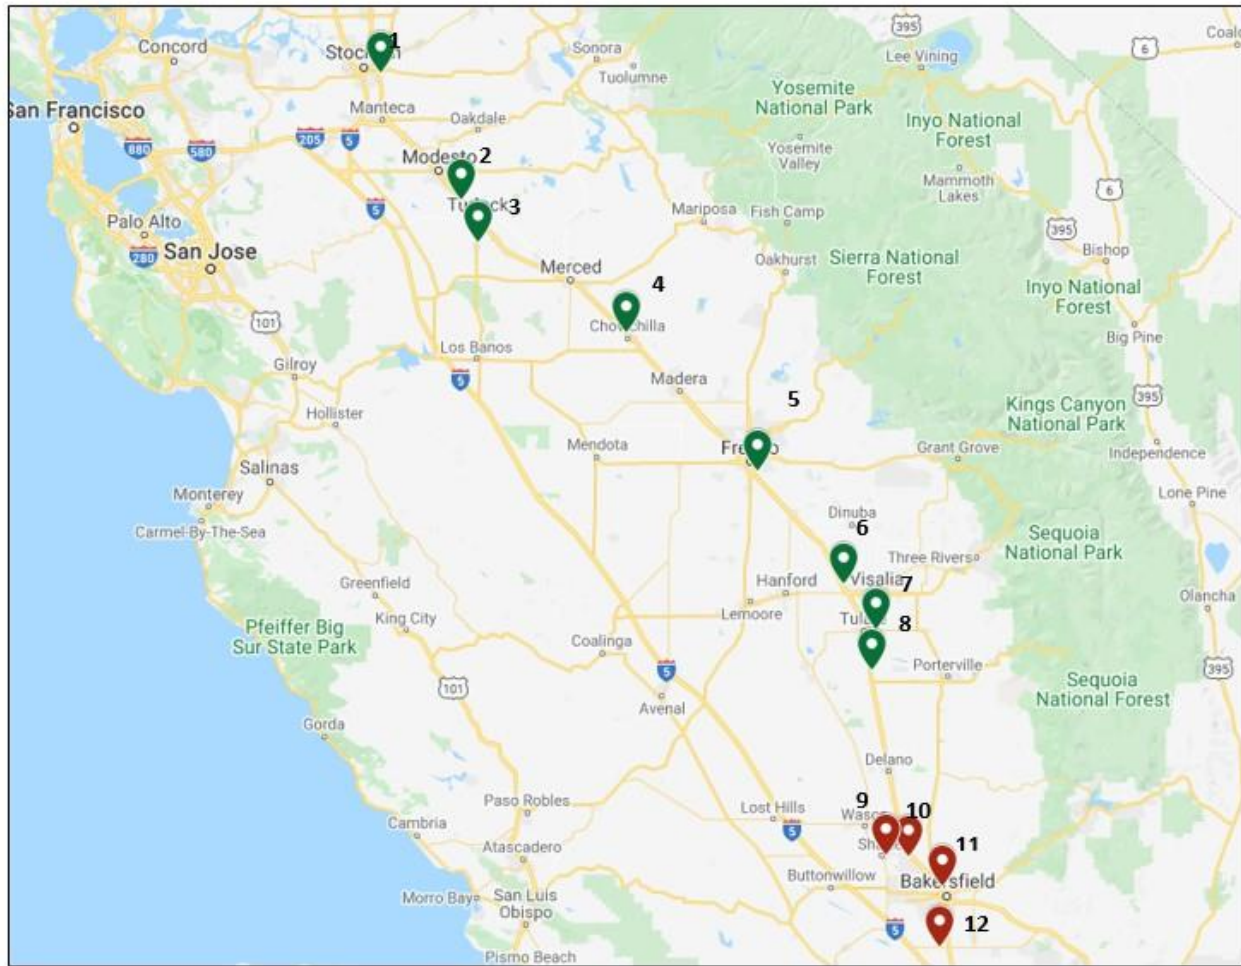

CVAS is pleased to announce drop box locations in California for forage, feed, water and manure samples. Samples left at these locations will be picked up after 11:15 AM starting at LG Seeds in Stockton, CA and heading south to Martella Livestock Auction in Tipton, CA. Pick-up will run Monday through Friday, excluding holidays when the lab is not in operation (see [www.foragelab.com](http://www.foragelab.com) for a list of holiday closings). For the additional Shafter and Bakersfield locations, pick up will be at approximately 3:00 PM. After the samples are picked up, they will be shipped overnight to our Waynesboro, PA lab.

Please send a text message to the number listed on the top of the drop box with the location, account name, and number of samples dropped off. This will assist us in planning the pick-up on any given day. Drop box locations may change or be increased over time as we obtain feedback from the field.

Results for NIR analysis should be available by the end of the next business day after the sample is picked up. Sample bags and testing information is available at each drop location. Supplies may also be requested by emailing [mail@foragelab.com](mailto:mail@foragelab.com).

Below are pictures of each location to assist in locating boxes, as well as a map with all locations marked (number next to the locations match the locations on the map). Approximate pickup times and complete addresses are listed below as well.

Please be respectful of the businesses that have given us permission to place drop boxes at their locations. Thank them for that privilege if you have the opportunity. We look forward to serving our client needs.

No.	Business	Location	Approx. Time of Pick Up*
