

CUMBERLAND VALLEY ANALYTICAL SERVICES

“Laboratory services for agriculture ... from the field to the feed bunk”

CVAS Central NY Sample Pick Up System

CVAS is pleased to announce drop box locations in Central New York for forage, feed, water and manure samples. **Samples left at these locations will be picked up after 10:00 PM** starting at Dansville Water Systems in Dansville and heading to the Finger Lakes Livestock Exchange in Canandaigua. **Pick-up will run Sunday through Thursday nights**, excluding holidays when the lab is not in operation (see www.foragelab.com for a list of holiday closings). After the samples are picked up, they will be taken to our Batavia, NY lab for processing. For Western NY, refer to our corresponding drop box location listings.

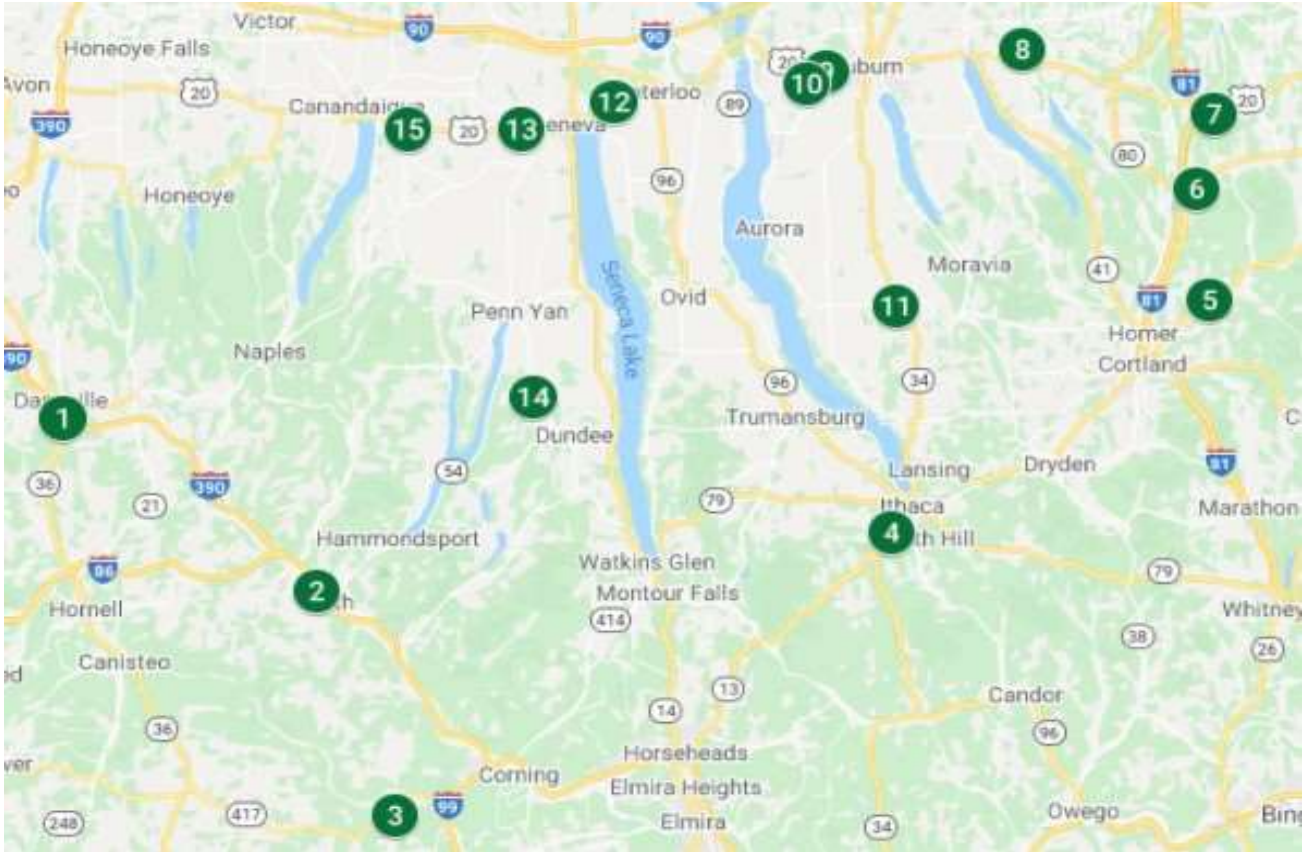

When dropping off samples, please **send a text message to the number** on the top of the drop box with the location, account name or number, and number of samples dropped. This information will assist us in planning the pick-up on any given day. Drop box locations may change or be increased over time as we obtain feedback from the field. Drivers may skip boxes if we do not receive a text due to traffic backups or weather issues if necessary.

Results for NIR I analysis should be available the next business day, following drop off. Sample bags and testing information is available at each drop location. Supplies may also be requested by emailing mail@foragelab.com.

Below are pictures of each location, the complete address of each business, and a map with all locations marked (numbers next to the locations below, match the locations on the map).

Please be respectful of the businesses that have given permission for us to place drop boxes at their locations. Thank them for that privilege if you have opportunity. We look forward to serving our client's needs.
