

“When can I expect my results?” is a common question we receive at CVAS. The answer to this question is determined based on the type of sample submitted and the package that was requested to be run on that sample. At CVAS there are two basic types of packages – NIR packages and chemistry packages. Samples submitted for NIR1, NIR2 and NIR3 packages have same day turnaround. If you are using the CNCPS model, the NIR1, NIR2 or NIR3 package are the preferred NIR packages. Chemistry packages are typically released 3 to 5 days after arrival, depending on the type of package requested and the feed type. Below are some minimum turnaround times for the more common tests offered at CVAS.

If you are sending your samples to one of our affiliate labs, with the exception of an NIR1 package, please add an additional day for turnaround time to accommodate shipping and receiving of samples.

Expected Turnaround Times (business days)*

NIR PACKAGES:

| | |
|---|----------|
| NIR1 (forages) | same day |
| NIR2 | same day |
| NIR3 | same day |
| NIR4 | next day |
| NIR5 | next day |
| NIR results on TMR, manure and grain samples may have a longer turnaround time. | |

CHEMISTRY PACKAGES:

| | |
|----------------------|--------|
| Standard | 3 days |
| Standard Plus Energy | 3 days |
| CPM Plus | 3 days |
| RFV | 3 days |
| Basic / NDF | 3 days |
| Minerals | 3 days |
| TMR Diagnostic | 5 days |
| TMR Control | 3 days |
| Animal Protein | 3 days |
| Liquid Sample | 3 days |
| With Karl Fischer | 5 days |
| Feed Mill Mixer | 3 days |

CHEMISTRY OPTIONS:

| | |
|-------------------|----------|
| Fermentation | next day |
| Fermentation Plus | 3 days |
| CSPS | next day |
| Particle Size | next day |
| Micron Size | 3 days |
| peNDF | next day |
| Starch | 3 days |
| Nitrates | 3 days |

INVITRO & INSITU TESTING:

| | |
|-----------------|---------|
| Time point plus | 5 days |
| MSPE | 3 Weeks |

AMINO ACIDS: 3-4 Weeks

TOXINS: 5 to 7 days

MOLD/YEAST: 5 days

FATTY ACID PROFILE: 5 to 10 days

Reporting accurate results is of the highest priority at CVAS. If your results are taking longer than the times listed, your results may not have met our standard review procedures and are being verified to ensure quality results are reported to you.

*Business closings due to holidays or weather, as well as equipment or mechanical issues, may add to turnaround time.
