

CUMBERLAND VALLEY ANALYTICAL SERVICES

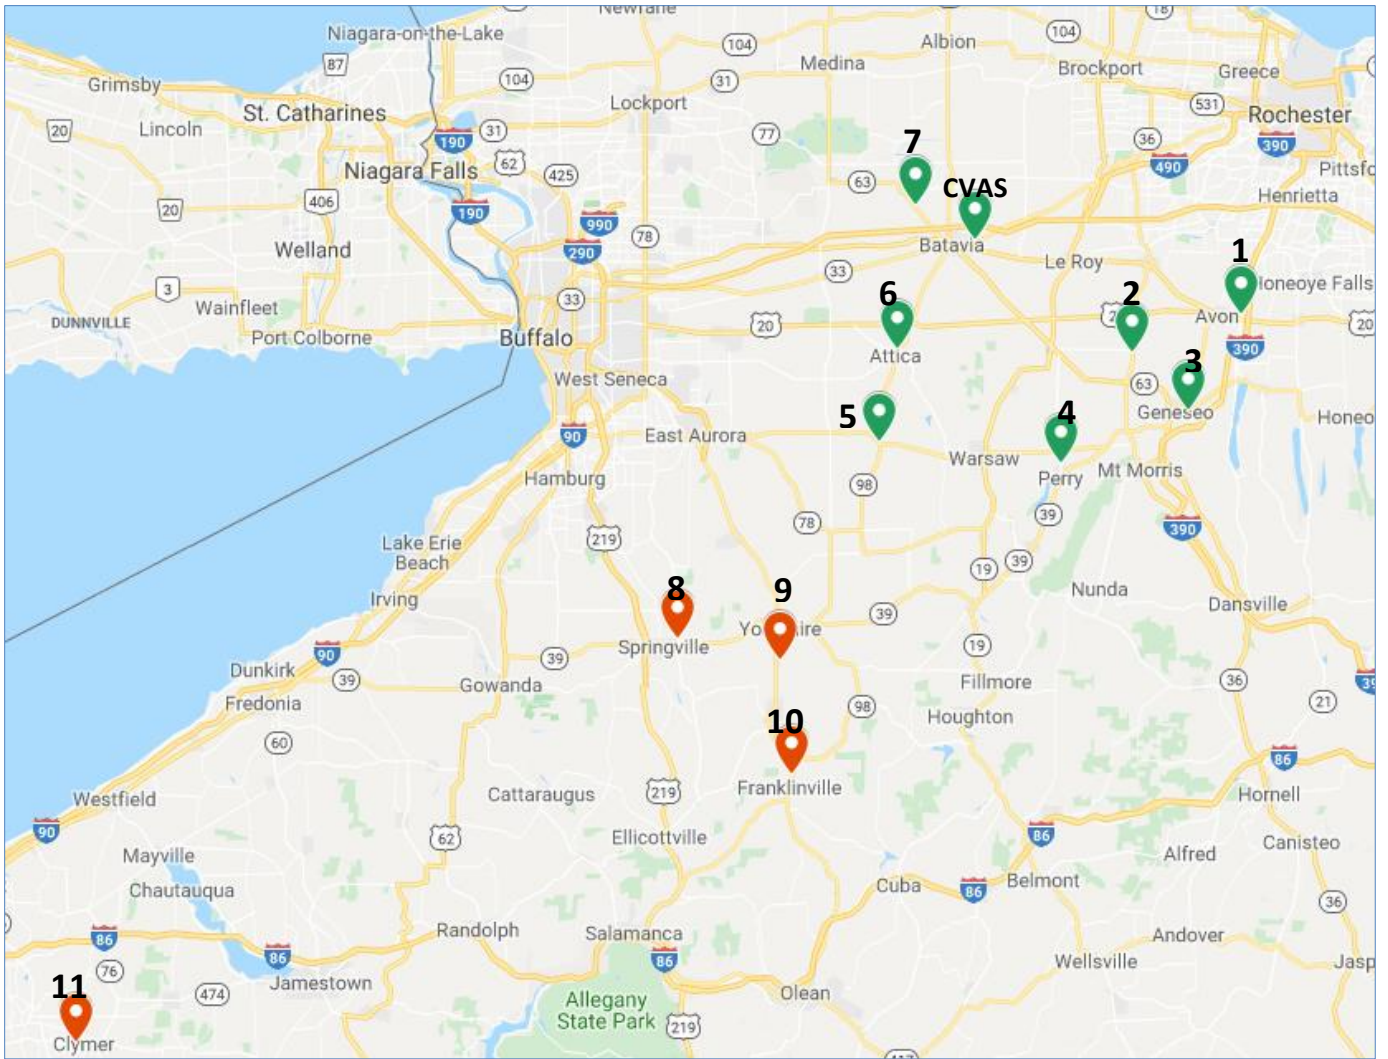

“ Laboratory services for agriculture ... from the field to the feed bunk ”

CVAS Western New York Sample Pick Up System

CVAS is pleased to announce drop box locations in Western New York for forage, feed, water, and manure samples. Samples left at these locations will be picked up after 6:00 am starting at Landpro Equipment in Oakfield and running counterclockwise to the Landpro Equipment in Avon (please see map with locations marked below). Pick-up will run Monday through Friday, with the exceptions of holidays when the lab is not in operating (see www.foragelab.com for a list of holiday closings). Note the locations marked with an asterisk (*) will only have Monday and Wednesday pick-up and will be picked up by 10AM. Significant snow may delay the pick-up of samples at times and plan accordingly.

When dropping off samples, please text the number on the top of the drop box with the location, account name, and number of samples. This will assist us in planning the pick-up on any given day. Drop box locations may change or be increased over time as we obtain feedback from the field. Results for NIR analysis should be available by the end of the day that the sample is picked up.

Below are pictures of each location with the latitude and longitude to assist in locating boxes as well as a map with all locations marked (numbers next to the locations match the locations on the map). Please be respectful of the businesses that have given permission for us to place drop boxes at their locations. Thank them for that privilege if you have opportunity. We look forward to serving our client's needs!

Indicates locations with daily pickup

Indicates locations with Monday and Wednesday pickup only (by 10AM) with next day reporting of results.
